

People.Power.Planet Announcement

At Home Newsletter Announcement – Year 1

Ignite: “People.Power.Planet”

This announcement introduces parents and caretakers to the newest campaign from People.Power.Planet. It is meant to spread the word about the program so students are encouraged to participate and can be included in newsletters and email updates that go out to the “grown-ups” in the students’ lives.

Announcement

Our school is beginning a new effort that will help us learn how to waste less energy and take better care of the earth: People.Power.Planet. Throughout the winter and spring, students and staff will learn how “People have the Power to better the Planet.” We will be forming a team called the Power Patrol that will conduct energy audits of our building and remind everyone to help save energy and the environment. Is your student interested in energy and how to be an environmental steward? Have them talk to their teacher or the school’s program Champion, [\[Insert Champion Name\]](#) to get involved. There are also “At Home” activities available on the PeoplePowerPlanet.com/schools website resources page for either your student or family to participate in together. We hope you’ll join us on the journey to help our school use less electricity and water, decrease waste, pollute less, and save money!
